#### (54) TOUCH PANEL COMPUTER

#### (57)Abstract:

PROBLEM TO BE SOLVED: To provide a touch panel computer capable of placing ten-keys at a left-hand side in use by a left-hander, to allow a user to operate the ten-key, without having the hand move by a large amount.

SOLUTION: This touch panel computer 11 comprises a liquid crystal panel 12 with a touch panel for touchinput, the tenkeys 13 for data input such as the input of numerical value, and arrow keys for moving a cursor left and right and up and down, a ROM 22 stores a left-hand and right-hand table 30 indicating the corresponding relation of the function of the corresponding tenkey, when the tenkeys 13 and a body 11a are used in a state of being turned 180 degrees, and a CPU 21 executes the corresponding processing of the function of the used tenkeys by reading out the functional information of each tenkey from the left-hand and right-hand table 30, when using the tenkey 13 and the arrows 14 with the body turned by 180 degrees.
